

Feras Rizqallah Kordom Al-Omari

Feras Al-Omari | Full-Stack, Web & Game Developer

Alias / Handle: Display ("feras")
GitHub: displaynameroblox
Roblox ID: 2875554080
Date: September 2026 | CV Version: 2.0

PROFESSIONAL PROFILE

Experienced software developer, game creator, and developer group leader skilled in engineering multi-platform applications, interactive roleplay games, custom developer libraries, and web platforms. Specializes in Luau scripting, code refactoring, and API automation. Passionate believer in programming and artificial intelligence as foundational drivers for the future of technology.

TECHNICAL SKILLS & SPECIALIZATIONS

Game Engine & Scripting:	Luau, Roblox Studio, DataModel architecture, C++ rendering concepts, GUI frame rendering.
Languages & Web Tech:	JavaScript, Node.js, Python, HTML/CSS layout conversion & UI pipelines.
API & Middleware Systems:	RESTful Web APIs, Reverse Proxy Routing (Wayback Machine/RoProxy), Avatar/Profile Automation.
Software Engineering:	Code refactoring & bug elimination, custom library design, Discord verification integrations.

FEATURED PROJECTS & DEVELOPMENTS

Project ReLife 2001 — Story-Based Roleplay Game

An immersive story and roleplay game set in 2000s New York City. Engineered as a complete recode and architectural overhaul of *Life in 2001* v0.3 to eliminate legacy code smells, bugs, and performance bottlenecks. Currently in active development (v0.0c lighting and sound system update).

Local Manager Lib (LML) — Roblox File & Code Manager

A developer library providing file importing, conversion, and asset management within Roblox. Includes custom engine parsing that converts HTML (v3 or lower) into native Roblox GUI frames, alongside JavaScript and multi-language script execution support inside the engine.

Roblox API & Profile Automation Utilities — Web & Systems Tooling

Engineered specialized utilities for platform identity management, reverse proxy routes, and programmatic account updates. Utilized web API endpoints (such as avatar thumbnail customization) to adjust 3D camera parameters and display names automatically.

LEADERSHIP & ONLINE PRESENCE

- Development Group Leadership:** Directing development projects, managing group releases, and leading collaborative code efforts.
- GitHub Open-Source Ecosystem:** Owner of displaynameroblox developer profile focused on Luau scripting, Node.js automation, and Roblox Web API tooling.
- Roblox Creator Footprint:** Active platform creator and developer since 2021 (Roblox ID: 2875554080) specializing in game engineering, open-source libraries, and AI application development.
